# “A DAY IN THE LIFE”

*Written by Bruna Lamacchia*

After two years of hard work together, the students of the Erasmus+ Led Group realize one of the most important factors: they all have the same feelings and problems to tackle with.

No matter the age, race, color or religion, teenagers from across the world have the same issues to deal with.

We are the world and we are all children of One Mother Nature.

*(This is the script for the Final Performance the students did together. It was written by the Italian teacher Bruna Lamacchia.*

*It tells about the students experience in an Erasmus + Project and it is based on real experiences.*

*It can be used as an oral activity in class)*

**Poland:**

Julia A.: Well, at home I have the same problems. My parents don't understand me. It was such a problem coming over to Spain. They told me a million times to behave myself, to wash properly, to eat, to say thank you and please. Do I have to go on!!??? I feel like the house dog and not their child.

**Spain:**

Lua: I have the same problem.

**Italy**

She's right
