X\*Very much

\*Slightly

\*Quite a lot

\*Not at all

*-Communication Skills*

X\*Very much

\*Slightly

\*Quite a lot

\*Not at all

## **SUMMARY:**

The project has been meaningful for all the students so far this moment. The idea of the project, to improve oral communication is clear and the activities aimed to achieve it are clear too for them.

They consider this type of project necessary and interesting at their school because they mean a change from routine, new ways of learning, new approaches to education, more awareness and openness to other cultures

There are a lot of benefits of the Erasmus + Project for the students: to have knowledge of other cultures, to acquire knowledge in an interesting and different way, to improve the knowledge of a foreign language, to exchange new experiences, new ways of learning, to explore interesting places and to meet and stay in touch with new friends from different countries.

The project has had impact so far in reflecting positive attitudes related to the topics worked, such as the improvement of oral communication.

Communication, social attitude, the works and activities done during the mobility, the school presentations and the work in groups are considered the most valuable aspects of the mobility.

ITC, Foreign Languages and the new knowledge acquired about the countries in the project are considered by the students to have improved due to the participation in the project.

Before and during the Project Meeting, students have improved a lot the use of new ICT tools, the communication skills and the awareness of different cultures.

And have improved quite a lot the use of innovation and classroom activities, the planning and organization skills and the awareness of different cultures.
